## ABOUT US

---

Mehta Metal Industries, established in 1978, is one of India's oldest and most trusted suppliers of metals. We specialize in stainless steel, aluminum, mild steel, copper, brass, and die steel, catering to diverse industrial needs. With decades of expertise, we provide high-quality materials from top brands like Jindal and Nippon. Our commitment to reliability, competitive pricing, and customer satisfaction sets us apart. At Mehta Metal, we forge lasting relationships with quality and trust.

## WHAT WE DO

At Mehta Metal Industries, we provide a wide range of high-quality metal products to meet diverse customer needs:

Stainless Steel: Various grades for construction and manufacturing.

Aluminum: Lightweight and corrosion-resistant for multiple industries.

Mild Steel: Versatile and strong for construction and fabrication.

Die Steel: Premium quality for precision engineering.

Copper: Excellent conductivity for electrical and plumbing use.

Brass: Corrosion-resistant for fittings and decorative applications.

We focus on exceptional customer service, timely delivery, and customized solutions. Choose us for reliable metal supply and expertise.

# STAINLESS STEEL PIPES

## Grades On Offer

- 200 Series: 201, 202
- 300 Series: 304, 304L, 316, 316L, 321, 310, 310S, 304H, 347 etc
- 400 Series: 409, 410, 420, 430, 431
- Duplex & Super Duplex: 2205, 2507
- Precipitation Hardening (PH): 17-4 PH

If your requirement includes any other specific grade, we can source it as per your needs.

## Seamless Pipes

Our seamless pipes are available in sizes ranging from 1/8" NB to 24" NB in Schedule 10 to XXS, meeting ASTM, ASME, and other international standards. Custom sizes and specific grades can be sourced as per your requirements

## Welded Pipes

Mehta Metal Industries offers high-quality stainless steel welded pipes, designed for strength, corrosion resistance, and ease of fabrication. in sizes ranging from 1/2" NB to 48" NB and thicknesses from Schedule 5 to Schedule XXS

# STAINLESS STEEL SHEETS/PLATES/COILS

## Grades On Offer

- 200 Series: 201, 202
- 300 Series: 304, 304L, 316, 316L, 321, 310, 310S, 304H, 347, etc.
- 400 Series: 409, 410, 420, 430
- Duplex & Super Duplex: 2205, 2507
- Precipitation Hardening (PH): 17-4 PH

If your requirement includes any other specific grade, we can source it as per your needs.

Mehta Metal Industries provides premium stainless steel sheets, plates, and coils sourced from top global brands such as Jindal, Aperam, POSCO, Nippon, and Acerinox. We offer both Hot Rolled (HR) and Cold Rolled (CR) products, ensuring superior quality, strength, and corrosion resistance for various industrial applications.

Our sheets and plates are available in sizes ranging from 0.1mm to 200mm in thickness and up to 6000mm in width, making them ideal for diverse projects. Whether you need standard sizes or custom specifications, we can source materials to meet your exact requirements.

# STAINLESS STEEL SQUARE/FLAT/HEX/ROUND BARS

## Grades On Offer

- 200 Series: 201, 202
- 300 Series: 304, 304L, 316, 316L, 321, 310, 310S, 304H, 347, etc
- 400 Series: 409, 410, 420, 430
- Duplex & Super Duplex: 2205, 2507
- Precipitation Hardening (PH): 17-4 PH

If your requirement includes any other specific grade, we can source it as per your needs.

We supply a diverse range of stainless steel bars, including round, square, and hexagonal shapes, with sizes ranging from 1mm to 250mm. Our products are sourced from trusted brands such as Rajputana, Viraj, Ventana, and Suraj, ensuring high quality and reliability. These bars are suitable for various applications in construction, manufacturing, and engineering. Whether you need standard sizes or specific custom requirements, we are here to fulfill your needs.

# STAINLESS STEEL FITTINGS

## Grades On Offer

- 200 Series: 201, 202
- 300 Series: 304, 304L, 316, 316L, 321, 310, 310S, 304H, 347, etc.
- 400 Series: 409, 410, 420, 430
- Duplex & Super Duplex: 2205, 2507
- Precipitation Hardening (PH): 17-4 PH

If your requirement includes any other specific grade, we can source it as per your needs.

We offer a comprehensive range of stainless steel fittings, manufactured in-house to ensure the highest quality and 100% guarantee. Our fittings include **Elbows, Tees, Reducers, and Flanges**, designed for durability and optimal performance in various applications. With our stringent quality control processes, you can trust that our fittings will meet your exact specifications and withstand demanding conditions. Choose us for reliable SS fittings tailored to your needs.

# ALUMINIUM

## Grades On Offer

- 1. Aluminum 1100
  - Applications: Chemical and food processing, decorative components, heat exchangers.
- 2. Aluminum 2024
  - Applications: Aircraft structures, truck wheels, precision components.
- 3. Aluminum 3003
  - Applications: Roofing, siding, cooking utensils, storage tanks, pressure vessels.
- 4. Aluminum 5052
  - Applications: Marine products, fuel tanks, pressure vessels, architectural panels.
- 5. Aluminum 6061
  - Applications: Structural applications, construction, aerospace, automotive parts.
- 6. Aluminum 7075
  - Applications: Aerospace parts, high-stress components, sports equipment.

If your requirement includes any other specific grade, we can source it as per your needs.

# ALUMINIUM

## Product list

At Mehta Metal Industries, we offer a wide range of aluminum products to meet diverse industrial needs. Our product portfolio includes:

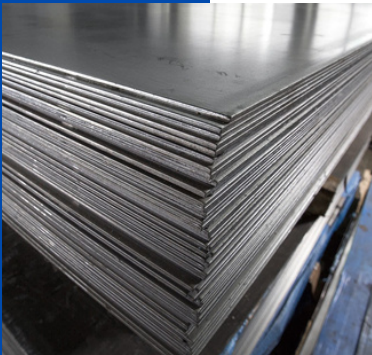

- Aluminum Sheets and Plates: Available in various grades and thicknesses for structural, automotive, and aerospace applications.
- Aluminum Coils: Suitable for roofing, siding, and industrial uses.
- Aluminum Rods and Bars: Used in construction, machining, and architectural applications.
- Aluminum Pipes and Tubes: Ideal for fluid transportation, structural frameworks, and irrigation systems.

We source premium-quality materials from trusted brands to ensure reliability and performance across industries.

At Steellite Metal And Tubes, we source aluminum products from some of the most reliable and trusted brands in the industry, including:

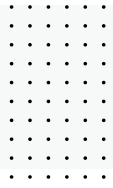

- Hindalco
- Nalco
- Balco
- Jindal
- Vedanta

These brands are known for their high-quality materials, ensuring that our customers receive durable and dependable products for their industrial applications.

# MILD STEEL

TATA STEEL

## Overview & Product Range

At Mehta Metal Industries, we offer a comprehensive range of Mild Steel products, ensuring high-quality materials for various industrial needs. Our selection includes sheets, plates, coils, rods, bars, and pipes, available in multiple sizes, thicknesses, and grades. We supply hot rolled, cold rolled, and galvanized options, all adhering to industry standards like IS 2062.

### Applications Across Industries:

- **Construction:** Used in structural components such as beams, columns, and reinforcement bars for buildings, bridges, and infrastructure.
- **Manufacturing:** Ideal for producing machinery, equipment, and tools.
- **Automotive:** Essential for chassis, body parts, and frameworks.
- **Energy:** Supplied in pipes and tubes for pipelines, storage tanks, and transmission towers.
- **Agriculture:** Used in agricultural equipment and storage solutions.

### Why Choose Us?

We source our mild steel from trusted brands like Tata Steel, Jindal Steel, and SAIL, ensuring top-notch quality and reliability. Mehta Metal Industries offers tailored solutions, custom sizes, and timely delivery, making us your trusted partner for all mild steel requirement

# ALLOY STEEL

## Product list

Our Alloy Steel Product Range Includes:

- Alloy Steel Sheets and Plates: Used in manufacturing machine components, pressure vessels, and structural frameworks.
- Alloy Steel Coils: Perfect for automotive, engineering, and aerospace sectors requiring superior toughness.
- Alloy Steel Bars and Rods: Ideal for tool manufacturing, machinery parts, and precision applications.
- Alloy Steel Pipes and Tubes: Suitable for oil, gas, and petrochemical industries due to its strength and corrosion resistance.

Popular Alloy Steel Grades We Offer:

- EN8: Common in engineering applications like shafts and axles.
- EN24: High-strength steel for aerospace and automotive parts.
- SAE 4140: Known for toughness, ideal for tooling and machinery.
- SAE 4340: High-strength, used in aerospace and heavy-duty engineering.
- 16MnCr5: Case-hardening steel for gears and shafts.
- AISI 8620: Low-alloy steel for automotive components like gears and bearings

# HIGH NICKEL ALLOYS

## OVERVIEW

Mehta Metal Industries offers a premium selection of High Nickel Alloys, designed for exceptional performance in extreme environments requiring corrosion resistance and high-temperature strength. These alloys are ideal for industries such as chemical processing, aerospace, and marine applications.

Popular High Nickel Alloy Grades We Offer:

- Inconel 625: Known for its outstanding resistance to high-temperature oxidation and corrosion, ideal for aerospace, marine, and chemical processing.
- Inconel 718: A high-strength, heat-resistant alloy used in gas turbines, rocket engines, and aerospace components.
- Hastelloy C-276: Excellent resistance to a wide range of aggressive chemicals and high-temperature environments, used in chemical processing and pollution control.
- Monel 400: Corrosion-resistant nickel-copper alloy used in marine environments, chemical processing, and oil drilling.
- Nickel 200: A pure nickel alloy with excellent corrosion resistance in alkalis, ideal for chemical processing applications.

Our high nickel alloys are sourced from leading manufacturers, ensuring reliability and superior performance in demanding applications.

# COPPER/BRASS/PB

## OVERVIEW

Mehta Metal Industries offers a wide variety of Pb (Lead), Brass, and Copper products, each known for their unique properties and versatility in industrial applications. These materials are essential in sectors such as electrical, construction, automotive, and manufacturing due to their excellent conductivity, corrosion resistance, and malleability.

- Pb (Lead): Used primarily in batteries, radiation shielding, and construction materials, offering high density and malleability.
- Brass: An alloy of copper and zinc, known for its excellent machinability, corrosion resistance, and aesthetic appeal, making it ideal for applications in hardware, plumbing, and electrical components.
- Copper: Valued for its excellent electrical and thermal conductivity, copper is used extensively in wiring, plumbing, and heat exchangers.

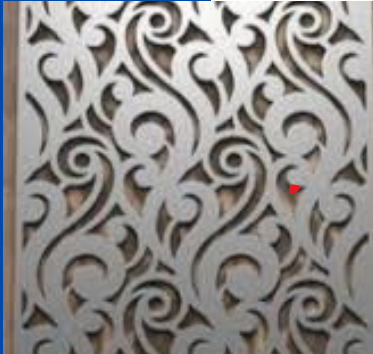

At Mehta Metal Industries, we supply these materials in various forms including sheets, rods, tubes, and wires, catering to specific requirements for different industries. Our high-quality offerings ensure durability and performance for a wide range of applications.

# DESIGNER SHEETS

## OVERVIEW

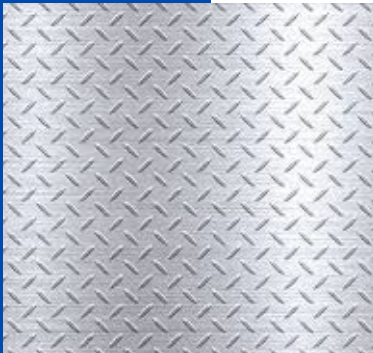

At Mehta Metal Industries, we offer a wide variety of Designer Sheets that combine aesthetics with durability, making them perfect for architectural and decorative applications. These sheets are designed to enhance the visual appeal of buildings, interiors, and exteriors while maintaining the strength and resilience of high-quality metals.

Our Designer Sheets come in a range of finishes, including brushed, mirror, textured, and embossed, and can be customized to suit specific design preferences. They are available in stainless steel and other metals, offering versatility for different projects. Whether you're working on modern facades, interior designs, or high-end decorative features, our designer sheets provide a premium solution.

### Product Forms Available:

- Designer Sheets (Brushed, Mirror, Textured, Embossed)
- Custom Designs and Patterns
- Stainless Steel and Aluminum Options

Our designer sheets are sourced from top manufacturers, ensuring exceptional quality, durability, and aesthetic appeal for your projects.
